

DESCRIPTION

Developed by Bath Institute of Medical Engineering (BIME) to be used with the Desk Clamp to hold paper/card in position whilst being cut. Can also be used alone as a copy aid.

HOW TO USE

As a Cutting Aid: Simply slide the paper between the black and clear cones at the appropriate angle. Secure by tightening the screw knob. Position silver plate under desk clamp to secure to table.

		
<p>High Angle Suitable for those who approach cutting activities with a raised arm. Also suitable for reading activities.</p>	<p>Medium Angle The versatility of the paper holder means that the paper can be gripped at the ideal angle for the activity and the user.</p>	<p>Low Angle For those with particularly weak muscles, the ability to rest the arm on desk whilst cutting is a major benefit as it increases stability.</p>

As a Copy Aid: Simply slide one piece of standard A4 paper between the black and clear cones and position at “High Angle”. No need to tighten grip or clamp to desk.

KEY FEATURES

- Simple to use
- Removes frustration and assists user to concentrate on cutting action as no attention needed for stabilisation
- Impossible to knock over due to balance
- Light-weight and easily portable

RECOMMENDED FOR

		
Weak Grip	Poor Hand Control	One Handed
